## (E) BrokEnglish! (1/2)

Spencer, a computational linguist trying to lessen the amount of time he spends on email, writes a simple find-and-replace script that he hopes will mean he spends a little less time typing out language names.

The script goes through his emails before they're sent and automatically replaces certain two letter ISO 639I language codes (like $f r$ ) with the full names of the languages (like French):

| ISO 639-I <br> code | Language name |
| :---: | :---: |
| ce | Chechen |
| ch | Chamorro |
| en | English |
| fr | French |
| he | Hebrew |
| is | Icelandic |
| ro | Romanian |

Things seem to be going great... until he starts getting some very confused replies, like the following:

```

Subject: Re: Time-saving script
um, spence? i think something has gone REALLY wrong
with your script...

## (E) BrokEnglish! (2/2)

EI. What message did Spencer intend to send?

|  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | l

E2. Spencer's script replaced each of the six language codes one after another: for example, all instances of $f r$ were replaced before any of the other codes were replaced. Determine in what order the script must have replaced the codes.
$\qquad$

E3. What would Spencer's script do to the following input?
fresh fish from concentrate

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

E4. What alternate ordering would produce the longest message when given Spencer's original email as input?
